Arslan Khalid

AI Engineer

arslankhalid.work@gmail.com | LinkedIn | GitHub | WhatsApp | (+92) 341-9507071

AI Engineer with 4+ years building production LLM and voice-AI systems, currently leading teams of 8–10 engineers at Zylo Technologies. Shipped multi-tenant AI platforms in live use by school districts, dental clinics, and cafes — spanning agentic workflows (LangChain/LangGraph), RAG, and real-time voice agents (LiveKit, sub-700ms latency).

Education

B.Sc. Electrical Engineering
University of Gujrat
CGPA: 3.12
Nov 2020 – Jul 2024

Relevant Courses:
- Advanced ML Algorithms by Stanford University
- Supervised Machine Learning by Stanford University
- Django Web Framework by Meta

Skills

Languages:	Python · TypeScript · JavaScript · SQL · C++
AI Engineering:	LLMs (OpenAI, Claude, Gemini) · AI Agents · RAG · LangChain · LangGraph · Prompt Engineering · Structured Outputs · MCP · Claude Code · LLM Evaluation
Voice & Real-Time AI:	LiveKit · Vapi · Twilio · Deepgram · WebRTC · WebSockets · Wake-Word Detection
Backend & Web:	FastAPI · Django · Node.js · React · Next.js
Databases & DevOps:	PostgreSQL · Redis · Qdrant · Pinecone · Prisma · Docker · Git · GitHub Actions · AWS
Machine Learning:	PyTorch · TensorFlow · OpenCV · Hugging Face
Soft Skills:	Leadership · Team Coordination · Critical Thinking · Problem Solving

Experience

- **Zylo Technologies (On-site)** — DHA Phase 6, Lahore
  AI Development Team Lead — *Nov 2025 – Present*
  - Lead cross-functional teams of 8–10 engineers delivering three production AI platforms (ZARM, Scale Connect, AI-FSL), owning architecture, delivery timelines, and engineering standards.
  - ZARM (team of 10): built an AI consulting platform that compresses weeks of manual discovery into a structured 5-day sprint — AI agents generate interview questions, extract pain points and risks from meetings, and score business processes on AI readiness, delivering clients a prioritized AI roadmap in one week.
  - Scale Connect (team of 8): delivered a property portfolio & financial dashboard centralizing real-estate metrics, with structured LLM prompting for automated, data-driven financial strategy insights.
  - AI-FSL (team of 10): delivered a multi-tenant French-language education platform live in 2 school districts with 88 teachers onboard — AI generation cuts long-term lesson planning from weeks to 2 minutes, and a LiveKit-based CEFR interviewer delivers sub-700ms latency with highly accurate proficiency results.
  - Established CI/CD, testing, and LLM prompt/model evaluation pipelines across all project teams.
- **Zylo Technologies (On-site)** — DHA Phase 6, Lahore
  AI Engineer — *May 2025 – Nov 2025*
  - Served as AI Solution Architect for Brewly, an AI cafe management system: weather- and event-aware inventory forecasting with 90%+ accuracy, time-of-day smart bundles that boosted 3–5pm sales by up to 30%, and a LiveKit-powered AI drive-thru agent with sub-700ms response latency — deployed at Taken Cafe, Dubai.
  - Built Flossie.ai, a voice front-desk assistant for dental clinics (Vapi + Twilio) that answers calls, books appointments, sends doctor reminders, and supports multi-branch practices — live in 10+ clinics.
  - Developed an AI meeting notetaker that joins Google Meet, Zoom, and Teams calls and delivers transcripts, summaries, and actionable next steps.
  - Built EasyGen, a LinkedIn post-generation platform trained on top-influencer content, shipped with a companion Chrome extension.
- **GulzarSoft (On-site)** — Gujrat, Pakistan
  Machine Learning Engineer — *Nov 2024 – Apr 2025*
  - Designed and implemented a collaborative filtering model for a car recommendation system, enhancing recommendation accuracy by 30%.
- **Coders Launchpad (Remote)** — Dubai, UAE
  Machine Learning Engineer — *Dec 2023 – Apr 2024*

- Developed a voice-to-voice conversion model for the Quran Project using RVC technology to transform users' voices while maintaining high-quality audio synthesis.
- Conducted rigorous training and optimization of the voice modulation models to ensure high accuracy, pronunciation clarity, and natural-sounding synthesis.

- **Freelancer** Gujrat, Pakistan
  Machine Learning Engineer *May 2021 – Mar 2024*
  - Designed and deployed custom machine learning models, automation scripts, and backend integrations for global clients.
  - Built AdCraft, an AI ad-creative studio cutting ad turnaround from a multi-tool design workflow to minutes: marketers upload an existing ad, specify new copy/product/CTA, and get production-ready variants — with on-image annotation feedback replacing trial-and-error prompting, plus carousels and post scheduling in one platform.
  - Developed Jarvis, a real-time AI voice assistant on LiveKit with custom wake-word detection and low-latency streaming conversational responses.

Projects

- **Project Syndra — Social Media Automation Engine**
  Python, Node.js, Docker, Web Scraping APIs
  - Developed an end-to-end automated news aggregation and publishing engine tailored for social media platforms using Python and Node.js.
  - Built a robust data pipeline to autonomously scrape, dynamically rank, and filter visual news content based on custom relevance algorithms.
  - Integrated external APIs to schedule and publish high-quality visual content, completely automating the content pipeline and saving 20 hours of manual curation weekly.
- **Cortex — LLM Reasoning Visualization Tool**
  React, TypeScript, Python, FastAPI, WebSockets
  - Designed and deployed a full-stack software system dedicated to tracking, logging, and visually mapping the internal reasoning chains of Large Language Models (LLMs).
  - Built a highly responsive frontend dashboard and robust backend architecture to process and display complex AI inference steps in real-time.
  - Enabled developers to effectively debug, audit, and optimize LLM prompts and agent behaviors through comprehensive visual analytics.

Awards

- Earned the **Master** title on Kaggle for excellence in data science and machine learning competitions.
- Received funding for my Final Year Project through the **IGNITE NIGRI** national grant program.
- Achieved **top 5** position in Devathon, a nationwide hackathon organized by Devsinc, Pakistan.
